

The image contains three hand-drawn diagrams on a grid background, each showing geometric relationships between points, lines, and angles.

Diagram 1 (Top): Shows a central point connected to several other points. A horizontal line passes through the central point. A vertical line segment is labeled 33.51 . A diagonal line segment is labeled 33.85 . An angle is labeled 33.60 . A small square symbol is at the intersection of the horizontal and vertical lines. A small circle with a dot is at the end of the diagonal line. A small square with a dot is at the end of the horizontal line. A small square with a dot is at the end of the vertical line. A small square with a dot is at the end of the diagonal line.

Diagram 2 (Middle): Shows a central point connected to several other points. A horizontal line passes through the central point. A vertical line segment is labeled 33.6 . A diagonal line segment is labeled 42.6 . An angle is labeled 73.1 . A small square symbol is at the intersection of the horizontal and vertical lines. A small circle with a dot is at the end of the diagonal line. A small square with a dot is at the end of the horizontal line. A small square with a dot is at the end of the vertical line. A small square with a dot is at the end of the diagonal line.

Diagram 3 (Bottom): Shows a central point connected to several other points. A horizontal line passes through the central point. A vertical line segment is labeled 33.1 . A diagonal line segment is labeled 33.7 . An angle is labeled 35.9 . A small square symbol is at the intersection of the horizontal and vertical lines. A small circle with a dot is at the end of the diagonal line. A small square with a dot is at the end of the horizontal line. A small square with a dot is at the end of the vertical line. A small square with a dot is at the end of the diagonal line.
