Office of the County Clerk,

BLACKAWAN COUNTY, IOWA.

Waterloo, April 15th 1863.

1863.

To Samuel D. Shaw

You are hereby notified that you have been appointed a Commissioner to view, and if required to locate, a _____ County Road, petitioned for by Samuel _____ and others. Said _____ Road petitioned for, is to commence at _____ Commercial Street—near the corner of Waterloo street—nearby S. on the West-side of the Locust River—nearby remaining along the street—on said corner S. the East-line of Section ~~5~~ 6 W. 89 R. 13

You will, therefore, appear at the Office of Samuel George J. P. _____ and _____ said County, on the 18th day of April _____ at 9. 1863, at 10 o'clock A. M., and qualify according to Law, and proceed immediately to the discharge of your duty and make your report thereon according to Law and the following Instructions, on or before the next term of this Court:

1. In your survey of this Road you will particularly describe the point of commencement, with reference to some monument record, which will generally be found to consist of corners in the public and private surveys; the exact course and distance from some one of which, you must give in your field notes.
2. You must also measure to, and in your field notes return the distance to some section or quarter section corner, from the point where you intersect each and every line of sections in the public surveys.
3. The point at which you terminate your survey must be ascertained and returned by reference to the same evidence as is herein required for the commencing point.
4. All letters and figures inscribed upon wood must be cut with a "marking iron," similar to that used in the government survey of lands.
5. Where bearing trees are taken, (and it is strongly enjoined that, if within ten chains of an angle, they should without fail be taken,) a smooth face fronting the angle of the Road, should be made as near the ground as practicable, and in this face should be cut the initial letters of the points of beginning and ending of the Road. For example—a Road from Dubuque to Cascade: D. & C. R. When bearing trees cannot be had at angles, it is recommended that the bearing and distance to a boulder, edifice, or corner of an enclosure be taken, and where this is impracticable, a large mound of earth should be raised at the point of the angle.
6. Marks in timber will consist of a smooth blaze with a notch in the center, except those trees which the line cuts, each of which must have three notches, both upon the side which the line strikes and that upon which it leaves the tree.
7. After completing your survey of this Road you must carefully protract the same upon paper, with a view to the detection of all errors, either in your chaining or course.
8. Before commencing your survey you must compare and adjust your chain to a standard kept for that purpose, in this office.
9. These Instructions in no way relieve you from each and every duty prescribed by the Code of Iowa, pages 91 and 92.
10. Your compass must be adjusted to run upon the true meridian; that is, the true magnetic variation only must be employed, and this must invariably be stated, and all changes, as a part of the field notes of this survey.

Given under my hand, and the Seal of said County, at my Office in Waterloo, this

15th

day of April
