Office of the County Clerk,

BACON COUNTY, IOWA.

Waterloo, Iowa.

1866

To S. R. Scott, Clerk.

You are hereby notified that you have been appointed a Commissioner to view, and if required, to locate, a Military County Road, petitioned for by S. Baug, and others, said Road, when petitioned for, is to commence at the corner between Lots #2 - 3 - 4 & 5 & 7 - 8 - 9 & 10 Block No. 2 in the Village of Waterloo, West Side of Cedar River.

You will, therefore, appear at the Office of C. H. Miller, in said County, on the day of June 1866, at one A.M., and qualify according to Law, and proceed immediately to the discharge of your duty and make your report theron according to Law and the following Instructions, on or before the next term of this Court: as soon as you conveniently can.

1. In your survey of this Road you will particularly describe the point of commencement, with reference to some monument record, which will generally be found to consist of corners in the public and private surveys; the exact course and distance from some one of which, you must give in your field notes.

2. You must also measure to, and in your field notes return the distance to some section or quarter section corner, from the point where you intersect each and every line of sections in the public surveys.

3. The point at which you terminate your survey must be ascertained and returned by reference to the same evidence as is herein required for the commencing point.

4. All letters and figures inscribed upon wood must be cut with a "marking iron," similar to that used in the government survey of lands.

5. Where bearing trees are taken, (and it is strongly enjoined that, if within ten chains of an angle, they should without fail be taken,) a smooth face fronting the angle of the Road, should be made as near the ground as practicable, and in this face should be cut the initial letters of the points of beginning and ending of the Road. For example— a Road from Dubuque to Cascade: D. & C. R. When bearing trees cannot be had at angles, it is recommended that the bearing and distance to a boulder, edifice, or corner of an enclosure be taken, and where this is impracticable, a large mound of earth should be raised at the point of the angle.

6. Marks in timber will consist of a smooth blaze with a notch in the center, except those trees which the line cuts, each of which must have three notches, both upon the side which the line strikes and that upon which it leaves the tree.

7. After completing your survey of this Road you must carefully protract the same upon paper, with a view to the detection of all errors, either in your chaining or course.

8. Before commencing your survey you must compare and adjust your chain to a standard kept for that purpose, in this office.

9. These Instructions in no way relieve you from each and every duty prescribed by the Code of Iowa, pages 91 and 92.

10. Your compass must be adjusted to run upon the true medium; that is, the true magnetic variation only must be employed, and this must invariably be stated, and all changes, as a part of the field notes of this survey.

Given under my hand, and the Seal of said County, at my Office in Waterloo, this

day of June 1866.

John M. Hinckley, County Clerk.
