

Office of the County Clerk, BLACKAWAN COUNTY, IOWA.

Waterloo,

1867.

To *John Dall*

You are hereby notified that you have been appointed a Commissioner to view, and if required, to locate, a _____ County Road, petitioned for by *D. E. Marshall*

and others.

Said _____

Road petitioned for, is

to commence at the S.E. cor. sec. 27 near house School house, house north on Sec. line. Runable to the S.E. cor. sec. 22 house W. on Sec. line. Run bounded N. by schoolhouse N. 8 rods house N. anything E. enough A strike the S.E. cor. of T.M. gr. 1614, sec. 22, house due N. about one half mile. A N. Chas. and _____ then a continuation from the point 110 rods N. of S.E. cor. sec. 23. Meet at the N.E. cor. of sec. 28 house, Sec. line, N. 1/2 Sec. 28, house from S.E. cor. sec. 28 on mile W. to old road measuring N. 8 S. house Sec. 28. Road to be located in place and line of old road. You will, therefore, appear at the Office of _____ in _____ and County, on the 25th day of March, A.D. 1867, at _____ O.C.M., and qualify according to Law, and proceed immediately to the discharge of your duty and make your report thereon according to Law and the following Instructions, and in before the next term of this Court:

1. In your survey of this Road you will particularly describe the point of commencement, with reference to some monument record, which will generally be found to consist of corners in the public and private surveys; the exact course and distance from some one of which, you must give in your field notes.
2. You must also measure to, and in your field notes return the distance to some section or quarter section corner, from the point where you intersect each and every line of sections in the public surveys.
3. The point at which you terminate your survey must be ascertained and returned by reference to the same evidence as is herein required for the commencing point.
4. All letters and figures inscribed upon wood must be cut with a "marking iron," similar to that used in the government survey of lands.
5. Where bearing trees are taken, (and it is strongly enjoined that, if within ten chains of an angle, they should without fail be taken,) a smooth face fronting the angle of the Road, should be made as near the ground as practicable, and in this face should be cut the initial letters of the points of beginning and ending of the Road. For example—a Road from Dubuque to Cascade: D. & C. R. When bearing trees cannot be had at angles, it is recommended that the mound of earth should be raised at the point of the angle.
6. Marks in timber will consist of a smooth blaze with a notch in the center, except those trees which the line cuts, each of which must have three notches, both upon the side which the line strikes and that upon which it leaves the tree.
7. After completing your survey of this Road you must carefully protect the same upon paper, with a view to the detection of all errors, either in your chaining or course.
8. Before commencing your survey you must compare and adjust your chain to a standard kept for that purpose, in this office.
9. These Instructions in no way relieve you from each and every duty prescribed by the Code of Iowa, pages 91 and 92.
10. Your compass must be adjusted to run upon the true medium; that is, the true magnetic variation only must be employed, and this must invariably be stated, and all changes, as a part of the field notes of this survey.

Given under my hand, and the Seal of said County, at my Office in Waterloo, this _____ day of _____ 1867.

De Clerk & Board of Supervisors of
Blackhawk County. State of Iowa. The facts
at the last Session of the Board of Supervisors
of Blackhawk County it was appointed
at Commissioner to view & if required
to locate a County Road in Section 36
Blackhawk County Petitioner for by Barney, E.
Wheeler & others. Under the Wheeler County Road
I did after being duly qualified by the
Clerk of Blackhawk County, on the 27th day of
March 1867 & did proceed to view said
Road and found on Examination that there
was great need for such Road for the benefit of
said Citizens in said location & also to the County
for the sale of the Swamp Land in that vicinity
& in consideration of the above I thought it
necessary to locate said Road according
to said Petition & left a slight change in
said Road where it crosses ~~the~~ Boone Creek on
said Section line as the Route on said line would
be very expensive & almost impassible & as I am
informed that the Petitioner intended to have a
small change in crossing said Creek, & as a part
of the Road Petitioner could not be located
without surveying the same I did on the 28th
day of March 1867 I survey the same & cause
to my assistance Barney, E. Wheeler & Marvin
the Minor Chairman & Elias Splees et al men in
locating said Road. See plat & field note
of said Road I should therefore recommend
that the Board approve of the said Road as
petitioner for with the slight change made
by the survey as plat does show ~~John Ball~~ ^{John} Ball ~~County~~
