Office of the County Clerk,  
BLACKWELL COUNTY, IOWA.

Waterloo, ..... 186.

To Chester Marsh.....

You are hereby notified that you have been appointed as Commissioner to view, and if required, to mark, a road from Cabin Hill, between the  
Road petitioned for, & Argenclem and others  
as follows:

Commencing at a point where the half  
section line running east and west  
through section 24 intersects the  
east line of said section, thence running  
south 5 $\frac{1}{2}$ ° west till it intersects the south  
line of said section 24,  
and to locate of experiment a road as  
follows:

Commencing at the point above described  
where the half section line running east  
and west in said section 24  
intersects the east line of said  
section - thence running south  
on said east line to the short  
east corner of said section, to  
intersect the section line road on  
the south line of said section twenty  
four

I now will therefore, inform you at the Office of Some Officer authorized  
to a Commissioner of Roads in the County, or the  
~~of Off~~, and qualify according to Law, and proceed ~~immediately~~<sup>on the 2<sup>d</sup> Monday in October, 1868</sup> to the discharge of your duty  
and make your report thereon according to Law and the following Instructions, on or before  
the ~~return~~<sup>end</sup> of this Month.

John H. Sibley, in Service

1. In your survey of this Road you will particularly describe the point of commencement, with reference to some monument record, which will generally be found to consist of corners in the public and private surveys; the exact course and distance from some one of which, you must give in your field notes.
2. You must also measure to, and in your field notes return the distance to some section or quarter section corner, from the point where you intersect each and every line of sections in the public surveys.
3. The point at which you terminate your survey must be ascertained and returned by reference to the same evidence as is herein required for the commencing point.
4. All letters and figures inscribed upon wood must be cut with a "marking iron," similar to that used in the government survey of lands.

5. Where bearing trees are taken, (and it is strongly enjoined that, if within ten chains of an angle, they should without fail be taken,) a smooth face fronting the angle of the Road, should be made as near the ground as practicable, and in this face should be ent the initial letters of the points of beginning and ending of the Road. For example—

a. Road from Dubuque to Cascade : D. & C. R. When bearing trees cannot be had at angles, it is recommended that the bearing and distance to a boulder, edifice, or corner of an enclosure be taken, and where this is impracticable, a large mound of earth should be raised at the point of the angle.

6. Marks in timber will consist of a smooth blaze with a notch in the center, except those trees which the line cuts, each of which must have three notches, both upon the side which the line strikes and that upon which it leaves the tree.

7. After completing your survey of this Road you must carefully protract the same upon paper, with a view to the detection of all errors, either in your chaining or course.

8. Before commencing your survey you must compare and adjust your chain to a standard kept for that purpose, in this office.

9. These Instructions in no way relieve you from each and every duty prescribed by the Code of Iowa, pages 91 and 92.

10. Your compass must be adjusted to run upon the true medium; that is, the true magnetic variation only must be employed, and this must invariably be stated, and all changes, as a part of the field notes of this survey.

Given under my hand, and the Seal of said County, at my Office in Waterloo, this

31<sup>st</sup> day of January 1868

South half of section No. Nine Iowa.  
in Township No. Nine west of Range  
No. Nine west in the County of Clark  
Hawk State of Iowa described as follows  
to wit: Beginning at a point where the  
half section line running east & west  
intersects the East line of said section

from thence to the point where the  
said road is but very little  
travelled, that the North West & south  
line of said section being four acre  
roads. Your Petitioners above therefore  
respectfully ask that said diagonal road  
as above described be vacated & a road  
located in lieu thereof as follows, to wit,  
commencing at a point as above describe  
where the half section line running east  
west in said section runs six miles  
sets the east line of said section from  
mid thence south to said east line  
one hundred six rods to the south  
East corner of said section to intersect

ment of this Board, etc.

In the afternoon, etc., sons

To the Honorable Board of Supervisors of  
Baltimore County

The undersigned having been appointed a  
Commissioner to view, and if possible best to locate  
a portion of the Waterloo and Wapakoneta road mentioned  
by Mr. Henn and others, would report as  
follows. - that having been duly sworn, he upon  
the day appointed examined said road, and after  
considering the reasons pro and con, came to the con-  
clusion that the prayer of the petitioners ought to  
be granted, - and would so recommend.

By reference to the accompanying plat, it will be  
seen that by following the section lines, the distance  
will be increased some one hundred and fourteen rods  
which seems to be the only reason for denying the  
prayer of the petitioners. - but this does not seem  
to be a sufficient reason to demand the maintenance  
of the present road across the section. While there  
is one on the south side, - and especially when the  
damage done to private property thereby is taken into  
account.

It will be expensive building and maintaining a road on  
either line, but according to the judgment of your com-  
mission, no more so when purchased for them where  
at present located.

All of which is respectfully submitted,

George F. C.

Chester Clark  
Commissioner.
