To the Honorable Board of Supervisors

of Davis County

Yours respectfully,
J. H. Underhugues, having been

appointed a Commissioner to view and
if thought necessary locate a certain
road in Davis County petitioned
for by the Sullivan et al. and known
as the Sullivan road would report
at Holtons) That, having been duly
known I found upon examination
that it was expedient and necessary
for the accommodation of the public,
that the road should be located
as petitioned for.

Yours Commissioner proceeds

to lay out & locate said road
in accordance with plat of road
which is here to record and make
part of this report.

Good Commission is of the opinion
that the road will be of great
convenience and utility to the public
and would hereby recommend its
establishment.

All of which is respectfully submitted

Dr. *A. A. Alline*

You are hereby notified that you have been appointed a Commissioner to view, and if expedient, to locate a county road, petitioned for by *Wm. McCullum* Road, and others, and to be called the *McCullum* Road, described as follows:

Commencing at the *North West corner of the North East quarter of Section No. thirty six (36) in Township No. Sixty three (63) North of Range No. fourteen (14) West, thence East to the North West corner of Section No. thirty two (32) in Township No. Sixty three (63) North of Range No. fourteen (14) West quite across*

You will, therefore, appear at the office of some Justice of the Peace, Notary Public, or Clerk of the Board of Supervisors, and qualify according to law; and on the *10* day of *April* 1868, you will proceed to commence the examination of the route above described, and if, in your judgment, the above road is needed, or one in the vicinity answering the same purpose, you will call to your assistance the necessary aid, and proceed to lay out and mark the same according to law and the following instructions, and report to the Board on or before the *1* day of *June* 1868.

1. In your survey of this road you will particularly describe the point of commencement, with reference to some prominent record, which will be generally found to consist of corners in the public and private surveys; the exact course and distance from some one of which you must give in your field notes.
2. The point at which you terminate your survey must be ascertained and distinctly indicated by the same evidence as is herein required for the commencing point.
3. All letters and figures inscribed upon wood, must be cut with a "marking iron," similar to that used in the Government survey of lands.
4. Where bearing trees are taken, and it is strongly enjoined that, if within ten chains of an angle, they should without fail be taken, a smooth face fronting the angle of the road, should be made as near the point as practicable, and in this face should be cut the initial letters of the points of beginning and ending of the road. For example—a road from Delhi to Colony—D. A. C. R. When bearing trees cannot be had at angles, it is recommended the bearing and distance to a boundary, either, or corner of an enclosure be taken, and where this is impracticable, a large mound of earth should be raised at the point of the angle.
5. Marks in timber will consist of a smooth "blaze" with a notch in the centre, except the trees with the line cuts, each of which must have three notches, both upon the side which the line strikes, and that upon which it leaves such trees. All posts must be set up at every mile, and the distance marked thereon.
6. After completing your survey of this road, you must carefully protect the same upon paper, with a view to the detection of all errors, either in your chaining or course.
7. These instructions in no way relieve you from each and every duty prescribed by the laws of Iowa Revision of 1860, pages 134 and 135.
8. All your assistants are required to be sworn by some person authorized to administer oaths.

Given under my hand and seal, this

10th day of
