Do *Joseph H. Munk*

You are hereby notified that you have been appointed a Commissioner to view, and if expedient, to locate a county road, petitioned for by *John Carleton* and others, and to be called the *Carleton* Road,

described as follows:

Commencing at the *Hatch House at the South West corner*

of Section 10 Township 33 N. Range 10 E. 31st Mer. (88)

North of Range 10 E. 31st Mer. (111) West of 5th St. Thence Northerly

You will, therefore, appear at the office of some Justice of the Peace, Notary Public, or Clerk of the Board of Supervisors, and qualify according to law; and on the *1st* day of *September* 18*70*, you will proceed to commence the examination of the route above described, and if, in your judgment, the above road is needed, or one in the vicinity answering the same purpose, you will call to your assistance the necessary aid, and proceed to lay out and mark the same according to law and the following instructions, and report to the *Board* on or before the *12th* day of *March* 18*70*.

1. In your survey of this road you will particularly describe the point of commencement, with reference to some monument record, which will be generally found to consist of corners in the public and private surveys; the exact course and distance from some one of which you must give in your field notes.
2. The point at which you terminate your survey must be ascertained and referred by reference to the same evidence as is herein required for the commencing point.
3. All letters and figures inscribed upon wood, must be cut with a "marking iron," similar to that used in the Government survey of lands.
4. Where bearing trees are taken, (and it is strongly enjoined that, in within ten chains of an angle, they should without fail be taken,) a smooth free pointing the angle of the road, should be made as near the ground as practicable, and in this free should be cut the initial letters of the pointed tree, and ending of the road. For example—a road from Delta to Colony—D. & C. If a bearing tree cannot be found, the bearing tree should be marked by a stake and distance to a bottle, either, or corner of an enclosure be taken, and where this is impossible, the line cuts, each of which must have three notches, both upon the side which the line strikes, and last upon the corner of the enclosure.
5. Marks in timber will consist of a smooth "haze" with a notch in the line trees. All posts must be set up at every mile, and the distance marked thereon. Stakes must be set at the crossing of fences, and at intervals in the prairie not exceeding one-fourth of a mile each.
6. At every crossing of your survey of this road, you must carefully protect the same upon paper, with a view to the detection of all errors, either in your chaining or compassing.
7. These instructions in no way relieve you from each and every duty prescribed by the laws of Iowa Revision of 1860, pages 134 and 135.
8. All your assistants are required to be sworn by some person authorized to administer oaths.

Given under my hand and seal, this *12th* day of *November* 18*70*.
