You are hereby notified that you have been appointed a Commissioner to view, and if expedient to locate county road as petitioned by *Belantes*
Stegardt and others, and to be called the *Stegardt*

Road, described as follows:

Commencing at the *beginning* at the East end of the "Palmer Road", being at the South West corner of Section of "Maple" (12) in Township of *Spring* (88) North of Range of *fourteen* (14) West of the 3rd Mer. Thence running East on *Stegard's* line about one & one fourth (1 1/4) miles to intersect the *Matamoros* & *Stegard* Road on the South line of Section of *Stegard* in Township of *Spring* (88) North of Range of *fourteen* (14) West of the 3rd Mer.

You will, therefore, appear before some officer authorized to administer oaths in and for said county, and qualify according to law; and on the *18th* day of

January 1878, you will proceed to commence the examination of the route above described, and if, in your judgment, the above road is needed, or one in the vicinity answering the same purpose, you will call to your assistance the necessary aid, and proceed to lay out and mark the same according to law and the following instructions, and report to the Board on or before the *18th* day of *February*, 1878.

1. In your survey of this road you will particularly describe the point of commencement, with reference to some monument record, which will be generally found to consist of corners in the public and private surveys; the exact course and distance from some one of which you must give in your field notes.
2. The point at which you terminate your survey must be ascertained and returned by reference to the same evidence as is herein required for the commencing point.
3. All letters and figures inscribed upon wood, must be cut with a "marking iron," similar to that used in the Government survey of lands.
4. At corners and figures inscribed upon wood, if you are unable to find them, they should be taken, a smooth face fronting the angle of the road, and the point of the road should be marked with a "marking iron," and in the case of a road from Death to Colony—D, E, F, G, H. When bearing trees cannot be had at right angles, it is recommended the beginning and distance to a boundary, collier, or corner of an enclosure be taken, and where this is impracticable, a large mound of earth should be raised at the point of the angle.
5. Marks in timber will consist of a snipe "blaze," with a notch in the center, except the trees with the line cuts, each of which must have three notches, both upon the side which the line strikes, and that upon which it leaves such trees. All posts must be set up at every mile, and the distance marked thereon.
6. After completing your survey of this road, you must carefully protect the same upon paper, with a view to the detection of all errors, either in your chaining or course.
7. These instructions in no way relieve you from each and every duty prescribed by the laws of Iowa Revision of 1860, pages 134 and 135.
8. All your assistants are required to be sworn by some person authorized to administer oaths.

Given under my hand and official seal this *16th* day of *January* 1878.
