To D. G. Ellis

You are hereby notified that you have been appointed a Commissioner to view, and if expedient to locate county road at petitioned by *John* and others, and to be called the *John*

Road, described as follows:

Commencing at the North East corner of Section No Thirty one (31) in Township No Eighty eight (88) North of Range No Eleven (11) West of the 3<sup>rd</sup> Mer. - thence following South due (1) mile

You will, therefore, appear before some officer authorized to administer oaths in and for said county, and qualify according to law; and on the *22<sup>nd</sup>* day of *April* 1878, you will proceed to commence the examination of the route above described, and if, in your judgment, the above road is needed, or one in the vicinity answering the same purpose, you will call to your assistance the necessary aid, and proceed to lay out and mark the same according to law and the following instructions, and report to the Board on or before the *22<sup>nd</sup>* day of *May* 1878.

1. In your survey of this road you will particularly describe the point of commencement, with reference to some monument record, which will be generally found to consist of corners in the public and private surveys; the exact course and distance from some one of which you must give in your field notes.
2. The point at which you terminate your survey must be ascertained and returned by reference to the same evidence as is herein required for the commencing point.
3. All letters and figures inscribed upon wood, must be cut with a "marking iron," similar to that used in the Government survey of lands.
4. Where bearing trees are taken, (and it is strongly enjoined that if within ten chains of an angle they should without fail be taken,) a smooth face fronting the angle of the road, should be made as near the ground as practicable, and in this face should be cut the initial letters of the pointed tree, bearing and distance of the road. For example:—a road from Delhi to Colony—D. & C. R. When bearing trees cannot be had at angles, they should be placed at the point of the angle to a boundary, edifice, or corner of an enclosure be taken, and where this is impracticable, a large monument should be placed at the point of the angle.
5. Marks in timber will consist of a snath, "blaze," with a notch in the center, except the trees be set up at every mile, each of which must have three notches, both upon the side which the line strikes, and that upon which it passes such trees, at the point where the line crosses the line cuts, and the distance marked thereon.—Stakes must be set at the crossing of fences and streams, and at intervals in the private not exceeding one-fourth of a mile each.
6. After completing your survey of this road, you must carefully protect the same upon paper, with a view to the detection of all errors, either in your chaining or course.
7. These instructions in no way relieve you from each and every duty prescribed by the laws of Iowa Revision of 1870, pages 134 and 135.
8. All your assistants are required to be sworn by some person authorized to administer oaths.

Given under my hand and official seal this *20<sup>th</sup>* day of *April* 1878.

County Auditor.
