

Notch's-Flubbard  
Chain-moos-niedert. 2

E 1/4 cor. sec. 23-T87N-R11W

At location indicated by random  
line dug hole 5 ft. square 18" deep

Found:- Nothing, Established

Corner on intersection of  $\frac{1}{4}$  fence west  
and Section line fence North. The  
 $\frac{1}{4}$  distance from center stone to  $\frac{1}{4}$  fence East, doubled comes on  $\frac{1}{4}$  cor. depending on  
plus taken to  $\frac{1}{4}$  E, since no stone or stake there.

A right line over center stone to  $\frac{1}{4}$  post comes 3.6' North of stone as now shown, the right line does not govern therefore. The best local evidence as to location is the intersection of the <sup>(Both old fences)</sup>  $\frac{1}{4}$  fence and Section fence, North and road East. At point where stone is, had been a ditch inside of road and corner could have been graded or washed out.
